## What we do

Since November 2015, the International Psychoanalytic University Berlin (IPU) has been working as part of WE INTEGRATE REFUGEES (WIR) to support people with a refugee background. The "StuFen" project was initiated by IPU students and has been funded by the DAAD (German Academic Exchange Service) since January 2016 as part of the "Welcome" project line.

We understand access to (further) education as one of the most central options for social integration. Therefore, we support people with a refugee background on their way to access a college/university in Berlin, for example in form of regular studies, guest audience, summer school, welcome program, buddy program, etc. We help with the search for a suitable college/university and offer support during the entire application process.

## Focus

- Placement at universities/colleges all over Berlin
- Support in the preparation of individual applications and CVs
- Supporting applicants along the entire path of preparing for their studies
- Personal support for applicants for information events at the relevant universities
- Examination of documents and assistance with procurement, translation and submission
- Mediation in the examination of school and university degrees
- Distribution of OLS language licenses by the DAAD
- Help with "BAföG" student grant applications and accompaniment to the Studierendenwerk Berlin (service provider for the students of the Berlin universities)
