## What we do

We assist with finding a suitable college or university and we provide support during the application process and during the course of studies.

According to Article 26 of the Universal Declaration of Human Rights, every human being has the right to education. Therefore, higher education must also be equally accessible to all according to their abilities. The aim of the StuFen project is to support people in forced situations of flight with finding higher education in Germany.

The StuFen project was set up by students of the International Psychoanalytic University (IPU) and the IPU has been involved in the StuFen project since November 2015 out of the want to offer assistance to refugees. Since January 2016, it has been funded by the German Academic Exchange Service (DAAD) as part of their Welcome-Program.
