| PD Dr. habil. Ewa Kobylińska- Dehe | History of Psychoanalysis in Poland within the German-Polish-Jewish Cultural Context 1900 – 2015 (<i>finalized</i>) | The aim of the project is to research the "forgotten" history of psychoanalysis in Poland. If one examines the specificity of psychoanalysis in Poland, one encounters a rhizomatic interweaving of Polish, German and Jewish cultures and self-understandings. The task of the project is to explore these differences, but also the convergences, and to combine this with the search for common lines of tradition. | Pedagogical University of Krakow | Polen | <ul style="list-style-type: none"> • Prof. Paweł Dybel (Pedagogical University of Krakow) |

| Jenny Lou Eis, M.A.-Psych. | 3RS A/V project: A reliability and validity study of the revised Rupture Resolution Rating System v2022 Ongoing since 2023 | The importance of rupture repair for the patient-therapist alliance has been demonstrated repeatedly but underlying processes require further investigation. For this, the Rupture Resolution Rating System (3RS) is the best observer-based measurement available. Recently, it has been revised (version2022), but its application to videotaped psychotherapy sessions is recommended. Therefore, this study aims to a) establish the 3RSv2022's interrater-reliability and construct validity in its application to audio-recorded psychotherapy sessions and b) validate 3RSv2022's in order to facilitate the use of this measure for a wider range of psychotherapy process research. | | USA, Austria | <ul style="list-style-type: none"> • Prof. J.Christopher Muran (Mount Sinai Beth Israel / Adelphi University, USA) • Prof. Wolfgang Lutz (University of Trier) • Prof. Christoph Flückiger (University of Kassel) • Prof. Sylke Andreas (University of Klagenfurt, Austria) • Research assistants: Levin Laser, M.Sc., Nicolas Luh, M.Sc. |
